About Us

At QUANTUM DESIGNS, we aim to provide our clients with complete Internet solutions where the emphasis is on interactive dynamic content. Our goal is to provide appealing and practical design, logical workflow and professional user interfaces to give our clients' target Audience state of the art, user-friendly products and to enhance their revenue through the site.

We have taken the route of specializing in Linux and Open source databases (MySQL), which brings down the cost of ownership of a very secure and stable system. E.g. For enAbilis (Hong Kong), we have used the system to handle Travel Agents and their clients in various parts of the world and to allow them access to our database of more than 5000 airfares and 6000 hotels.

We are recognized as a Software Technology Parks of India Unit by the Govt. of India and are located in the MIDC area, which has been earmarked by the State Govt. for rapid growth of the software industry. We have our own fiber-optic leased line with 16 fixed IP addresses to provide high speed Internet access 24x7.

Areas of Expertise

Complete web promotion, design and coding of web-sites. We have developed brochure as well as interactive sites. We are limited only by the requirements of our clients. We offer solutions like digital brochures, etc.

Design and development of databases. We have developed various databases with search and booking engines.

Interactive programs i.e. bulletin boards, email, newsletter, chat etc.

CRM programs which allow a business to build a database of their customers and use it to build and retain customer loyalty.

E-commerce : catalogues, shopping carts, room bookings, web interface to payment gateways for Credit Card and EFT settlement.
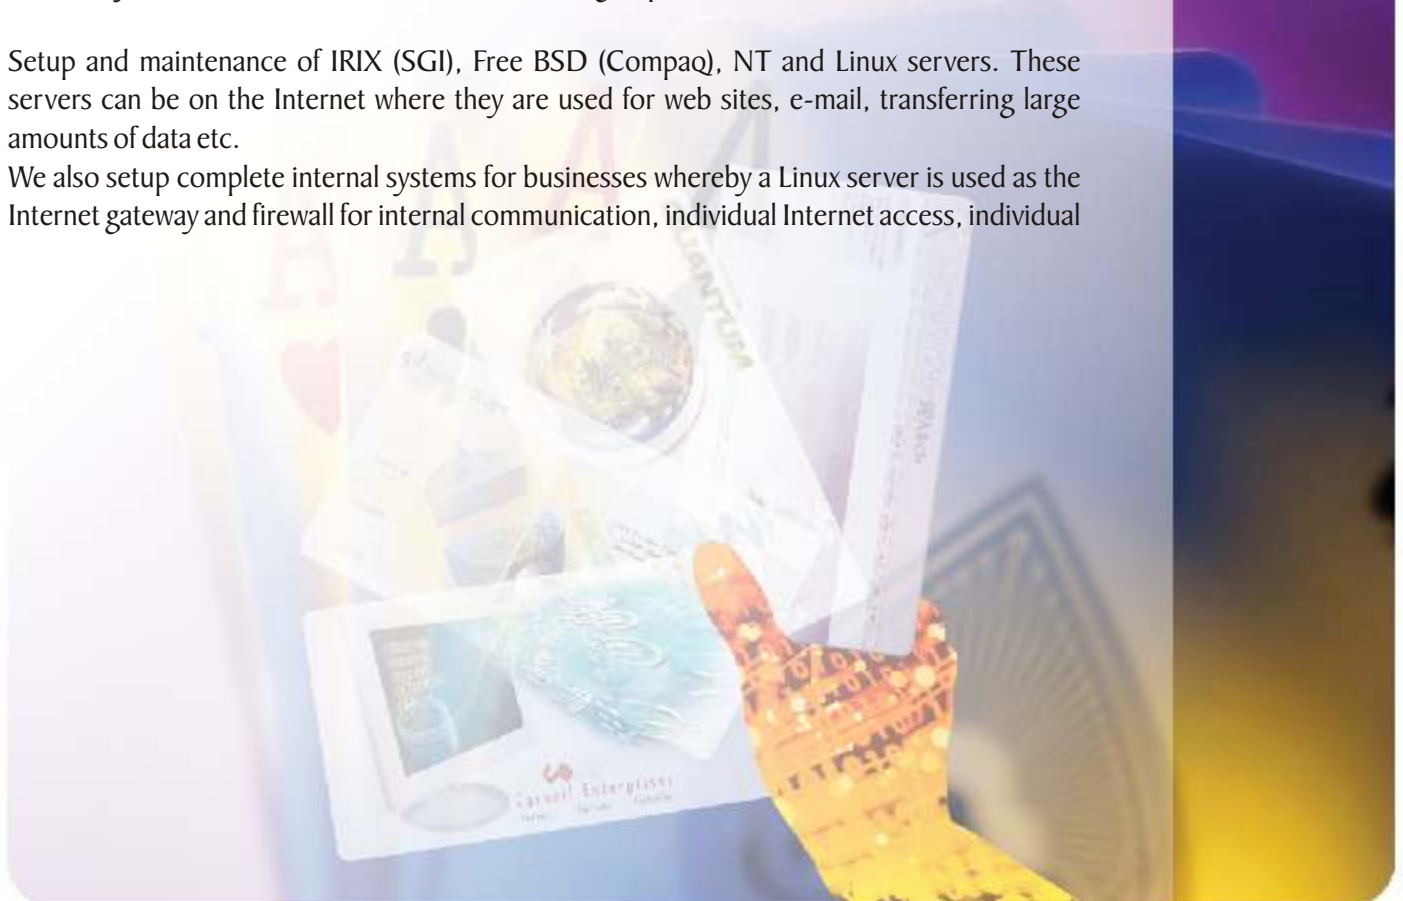

We develop custom interface programs to link legacy systems to the web e.g. We have developed interfaces to Galileo and Abacus for on-line availability and booking of flights.

Maintenance: Updating and creating new pages. Promotion of the web site and products. Search Engine optimisation and monitoring of Search Engine ranking. Providing statistical analysis of visitor information through Webtrends reports. We can guarantee you visibility on the first page of any search engine in the keywords of your choice, which provides the maximum return on investment for your site and for its advertisers!

Data entry, validation and translation services through a partner.

Setup and maintenance of IRIX (SGI), Free BSD (Compaq), NT and Linux servers. These servers can be on the Internet where they are used for web sites, e-mail, transferring large amounts of data etc.
We also setup complete internal systems for businesses whereby a Linux server is used as the Internet gateway and firewall for internal communication, individual Internet access, individual

Skills

Our team of programmers is highly skilled at :
C, C++, Perl, PHP3, CGI Scripting, Java
MySQL and Oracle Database connectivity techniques,
hand coded HTML, DHTML, XML and JavaScript.

Our Graphics Professionals are well versed in the different image formats and compression techniques. We also specialize in Image enhancement and Image retouching. We use Flash Macromedia, Adobe PhotoShop, Corel Draw, Adobe Illustrator, Adobe Acrobat, Animator Pro, 3D Studio and a number of other tools for editing images, sound and video.

Our expertise in pre-press technologies helps us to optimize images for the web. Careful hand coding makes our pages light and fast to download thus maintaining the interest of web surfers.

We also provide services for hosting, advertising and maintenance of web-portals.
